

"I thought I was going to have to give my **children up.**"

- A parent that attended a parenting class through Project CARE

His Story: "I attended this parenting class and now I truly believe that it would

benefit all people that have to deal with behavioral children. I know I still have a long way to go with my children, but right now all is better. Please accept my big

thank you for this program. I hope it becomes available to every parent, teacher or anybody who is in need of help. I thought I was going to have to give my children up, but now I feel like

I can do this again. That is something I thought I would never feel again.

Thank you."

An initiative designed to decrease child abuse and neglect by reducing risk factors and strengthen protective factors

- Over **8,000** clients served

- Over **\$100,000** in leveraged resources
